## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 2,332,473 ("Salander").

3. As regards claims 1, 3, and 8, Salander discloses a foot corrective device that anticipates applicant's invention. More specifically, Salander discloses a toe protector to be worn on the foot of a patient, the toe protector comprising: a tubular double-walled body (see Figs. 1 and 2) wherein radially inner and outer walls (11, 12) define an interstitial space therebetween; a substance (21, 22) filling said interstitial space; a distal end defining an opening in the body for exposing a distal end portion of the patient's big toe; a proximal opening in the body for insertion of the patient's big toe; said body proximal end including an elongate flap (19, 20) for covering at least a portion of the metatarsophalangeal joint; said elongate flap having a surface disposed generally adjacent to the patient's foot, said surface having a concave portion (aperture 23) disposed in covering relation with a sore on the patient's foot.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 2 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Salander in view of U.S. Patent No. 5,497,789 ("Zook").

As regards claims and 9, Salander discloses the features as recited above.

Salander fails to teach a strap. Zook, however, discloses a foot protector incorporating a viscoelastic gel. As can be seen from Fig. 5-7, the protector of Zook comprises a tubular portion and a strap that inherently maintains the protector on the user's foot.

In view of Zook, it would have been obvious to one having ordinary skill in the art to modify the device of Salander with the addition of a strap in order to better maintain the device on the user's foot.

#### ***Allowable Subject Matter***

8. Claims 4-7 and 10-12 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
